Emerging Technology Specialty Team

In the world of technology, the only constant is change. Whether it's designing the artificial intelligence that will drive autonomous fleets or engineering the additive manufacturing that will print organs for transplant, the power and promise of emerging technology is clear. Yet, with these opportunities come risks and uncertainties, requiring a new breed of lawyer, one who thinks without any "box" and excels at resolving novel and complex legal issues.

Butzel's experienced Emerging Technology Specialty Team has the depth and breadth required to tackle these technologies and their attendant legal complexities head on. Members of this Team frequently share their knowledge with other interested parties via presentation of numerous webinars, client alerts, and articles for industry publications on this topic. Our cross-disciplinary Team provides clients with the strategic planning, navigation, and support needed to address the many challenges that come along with advancements in technology.

We provide legal services covering a wide spectrum of industries:

- **Mobility** — including connected and autonomous cars, light-weighting, alternative fuel vehicles, and future factories
- **Cybersecurity and Privacy** — Protection, defense, and in the breach
- **Healthcare** — including telemedicine and medical devices
- **Internet of Things (IoT) and Consumer Technology**
- **Big Data, Artificial Intelligence, and Augmented Reality**
- **Aerospace and Defense** — including drones, satellites, and aircraft
