Blockchain Take the Wheel: Potential Applications for Blockchain in the Automotive Industry

Blockchain at Butzel Webinar Series
4.13.2021 | 12:00 – 1:00 pm

Advanced Level

While Bitcoin continues to make headlines, in many ways, the blockchain technology behind Bitcoin may end up having a larger impact on our lives. No longer just for sending money, blockchain is being adopted by everyone from Fortune 500 companies to local governments. Here in Michigan, blockchain also offers exciting possibilities for increasing efficiency, managing data, and improving supply chains within the automotive industry. This webinar will discuss some of the business cases for blockchain technology, and examine relevant legal considerations.
