Butzel AI Institute: AI for Property Professionals

Webinar

Virtual-Zoom

11.14.2024 | 1:00pm - 2:00pm

Generative AI for Real Estate Professionals: Generative AI ("GenAI") is transforming workflows for Real Estate professionals, including attorneys. Contract comparisons, drafting, analysis, and management functions are heavily targeted by software developers and vendors promising increased efficiencies and outcomes. Are you up to speed on the types of artificial intelligence (AI) tools that are available in this space to you, your clients, and your competitors? Do you know where the hidden risks are when evaluating or adopting these tools, and how to mitigate those risks?

In an era where AI is transforming industries and workplaces, staying informed regarding the tools your competitors and clients are considering is crucial for all businesses. Butzel understands the underlying technology and legal concerns whether it's basic AI, machine learning, deep learning, or the latest AI iteration to hit the market, GenAI.

Join Butzel as we explore these issues and more to keep you at the top of your Real Estate game.
