Butzel Long attorney Jennifer Dukarski appointed Co-Chair of the Women in Communication Law Committee in the ABA Forum on Communication Law

10.3.2017

ANN ARBOR, Mich. – Butzel Long attorney Jennifer Dukarski has been appointed Co-Chair of the Women in Communication Law Committee in the American Bar Association (ABA) Forum on Communication Law. She will remain a member of the Governing Committee for the next three years.

Dukarski focuses her practice at the intersection of technology and communications with an emphasis on emerging and disruptive issues in traditional and digital media, cybersecurity, infotainment, and connected and autonomous cars.

In her practice, she assists clients in traditional media issues including defamation, privacy, access, the Freedom of Information Act and Open Meetings Act issues. She has negotiated contracts for autonomous vehicle components, reviewed contracts involving wireless updates to in-vehicle technology, and has addressed multiple vehicle component recalls. Dukarski has become a national leader in legal issues facing emerging automotive technology and is the leader of Butzel Long's connected and autonomous car working group. She also has spearheaded the reporting efforts for two national data breaches and focuses on the threat vectors facing automotive component design.

A self-titled "recovering engineer," Dukarski serves as Counsel to the OESA's Product Development Council and has spoken on First Amendment issues ranging from newsgathering in the digital age to the impact of the FBI iPhone strategy. She has been a panelist at the North American International Auto Show for the last two years, covering a broad variety of legal concerns focused on the autonomous and connected car. She has appeared on several television programs, including Autoline and AutoBeat, and in many print interviews (including *CIO Magazine*,

PC World, *Bridge Magazine*, *Computer World* and *Automotive News*) discussing emerging technology and its related legal issues.

Prior to joining Butzel, she gained automotive manufacturing and design experience as a result of high-level quality management and engineering positions. She has worked extensively on successful automotive product launches, managing vendors and Tier One manufacturing facilities. A Six Sigma Master Black Belt, she applies her experience to create innovative approaches to the protection of IP assets and disruptive technology.

Dukarski has experience with field recalls and was a representative to the University of Michigan's CIREN (Crash Injury Research & Engineering Network) and UMPIRE (University of Michigan Program for Injury Research and Education). Working as a design engineer, she received multiple Record of Invention Awards for contributions to patents and trade secrets.

Last year, she was named a "2016 Honoree for Michigan Women in the Law" by *Michigan Lawyers Weekly*. She also is among *Michigan Super Lawyers* "Rising Stars" and *DBusiness* "Top Lawyers." She is a member of the Society of Automotive Engineers (SAE) and the Institute of Electrical and Electronics Engineers (IEEE). She serves as a Working Group member with IEEE PAR 1912 (Privacy and Security Architecture for Consumer Wireless Devices) which is focused on setting standards for privacy and security protocols. She also coaches and mentors' women engineers.

Moreover, Dukarski is an adjunct professor in the Paralegal Program, Intellectual Property, at Baker College.

She is a graduate of the University of Detroit Mercy School of Law (J.D., *magna cum laude*, 2010). She's also a graduate of the University of Detroit Mercy College of Engineering and Science, (B.S., Mechanical Engineering, *summa cum laude*, 1996).
