

→ Technology Transactions

Sheppard Mullin's Technology Transactions Team is an experienced cross-disciplinary team dedicated to serving our clients' needs in their technology projects. We are experts in the key technology transactions and issues that are shaping many industries, including:

- Software
- Technology services
- E-commerce & retail
- Advertising
- Mobile
- Robotics
- Big data
- Video games
- Financial services
- Biotechnology
- Pharmaceuticals
- Medical devices
- Food & beverage
- Automotive
- Aviation
- Energy

We help our clients find legal solutions to a broad range of technology projects, including:

- Licensing
- Technology transfer
- Outsourcing & IT projects
- Distribution arrangements
- Development agreements
- Cloud computing agreements
- Website & mobile app terms
- Open source licensing & counseling
- Strategic partnerships
- Technology joint ventures & spin-offs

- Advertising technology transactions
- Data commercialization
- Manufacturing & supply agreements
- Data center projects

We are big believers in industry-focused teams. We support each project with a team that understands our client's industry, technology, and objectives. We live and breathe technology transactions, know every aspect of deals, and work seamlessly with our client's legal and business teams. This enables us to provide our clients with the most effective ways to plan, structure, negotiate, document, manage, and close their most important technology transactions.

We get technology projects done

We love talking business and technology. Please contact the practice leaders or another team member if you have any questions.
