Sheppard Mullin

The following Sheppard Mullin partner will serve as a moderator at this event:

Aytan Dahukey, Partner and Leader, Healthcare Private Equity Practice

About:

The 2nd Annual VBC Symposium features healthcare sector pioneers that are creating enterprise value by putting the patient first. The U.S. Healthcare System is transforming and the behavioral health sector is rapidly adopting value-based care principles. This complimentary luncheon will cover the following important patient populations:

■ **Autism Care**

Specialized K-21 autism schools are an instrumental component contributing to independent, productive, and fulfilling lives for individuals on the autism spectrum. Kevin Gersh, Autism Care leader, will share how 6+ hours of daily interaction with students represents insightful and dynamic data sets paving the way for individualized life plans.

■ **Substance Use Disorder**

Individuals and families afflicted with substance use disorder have largely been failed by inadequate treatment programs, unscrupulous providers, or payor conflicts. Peter Schorr, Retreat Behavioral Health, will share how he is shifting the paradigm by integrating primary sub-acute mental healthcare and alternative reimbursement models.

Featured Speakers:

Kevin Gersh

Founder & CEO, The Gersh Organization (Autism Life Management)

Peter Schorr

Founder & CEO, Retreat Behavioral Health (Substance Use Disorder)

Moderators:

Aytan Dahukey

Partner and Leader, Healthcare Private Equity Practice, Sheppard Mullin (Healthcare Law)

James Castro

Managing Director, FocalPoint Partners (Healthcare Investment Banking)
