

The AI Patent Boom and How it's Impacting the Scope of Eligibility

New York Hilton Midtown
02.05.2020

Date & Time

Wednesday, February 5, 2020, 3:00 PM - 4:00 PM

Speakers

Gregory Discher - Covington
Kirupa Pushparaj - SquareUp
Barry Schindler - Greenberg Traurig
Siraj Husain - Sheppard Mullin

Description

Join us for an exciting session on how AI is driving another patent boom. We'll take a deep dive into the various interdisciplinary fields of AI, including computer vision, deep learning, robotic process automation, and neural networks. Learn what differentiates these categories in terms of utility and patent eligibility.

Key takeaways:

- Key challenges faced in patenting AI technologies, especially given how fungible & sector-agnostic it is
- Spotlighting AI patent trends and how they're impacting the scope of patent eligibility
- The largest filers of AI patents and where they're invested most heavily
- Examining the different classes of AI and how to differentiate them from a utility standpoint
- Business of law implications

Moderator:

Kirupa Pushparaj, Director, IP & Legal Operations ,SquareUp
