Webinar details will be sent upon registration

Recent estimates suggest that U.S. hospitals are losing more than \$1 billion dollars a day due to COVID-19 and that **up to 25% of U.S. hospitals could file bankruptcy, close or sell in the next 12 -24 months** due to continuing weak revenue, COVID-19 structural changes, higher expenses and inadequate federal and health plan support - *unless critical early action steps are taken*. Join Sheppard Mullin, ToneyKorf Partners and Cain Brothers in a 90 minute discussion of:

- The state of U.S. hospitals today, who is at risk and concerning trends, drawing on **Cain Brothers'** up to date assessment of the regional impact of COVID on the hospital sector and the likely impact of accelerated merger and affiliation transactions
- **ToneyKorf's** intriguing Pandemic Impact & Mitigation Strategy (PIMS) model to forecast the COVID-19 pandemic impact on hospital financial stability, and key early action initiatives to reduce insolvency risk
- Market transactions and opportunities highlighted by **Sheppard Mullin** that can transform hospitals and position them for successful recovery

Presented By

This webinar will include an opportunity for audience discussion and presentations by the following industry experts:
