

Protect the Privilege: Maintaining Attorney-Client & Work Product Privilege During a Cyber Incident

3rd Annual 2020 USD Cyber Law, Risk & Policy Symposium

Virtual

10.26.2020

When:

11:30 a.m. - 12:30 p.m. PT

Sheppard Mullin Participant:

Justine Phillips

About:

Join us October 26, 2020 for a timely webinar to discuss how to establish and preserve the attorney-client privilege and work product doctrine during a cyber investigation following the *Capital One* case decided earlier this year. Panelists will offer actionable guidance and share perspectives from the bench, in-house, forensic investigation and as outside counsel on the following topics:

- Highlights of the *Capital One* case
- Establishing and maintaining attorney-client privilege & attorney work product doctrine
- Understanding the distinctions between in-house and external counsel for privilege purposes
- Understanding what is and what is not privileged in forensic investigations
- Standards judges use to determine waiver and whether to compel forensic reports
- Disciplined internal communications by your Info Sec team
- Disclosing the “forensic report” and avoiding waiver landmines
- Whether privilege exists for remediation decisions/work/recommendations
