

Cybersecurity Stories: Lessons Learned from the Cybersecurity Community

Virtual
08.23.2022

It seems like everyone has a story about being ransomed for bitcoin to get access to your business infrastructure. Over 50% of all cyber-attacks are done on small businesses. Enterprises experienced 130 security breaches per year, per organization. The cost of cyber security increase by 22.7% in 2021 with the annual number of security breaches in enterprise organizations increasing by 27.4%. (Stats from Purplesec)

This event is for CEOs, CTO, IT executives, and others in the C-Suite. Topics to be discussed:

- Things you should know today to be prepared for your Cyber Insurance renewal
- Legal risks of Cyber-failures (or, what can happen when IT and Executive teams don't communicate)
- The ramifications of a Cyber-breach and what happens next.
