

## Addressing the Challenges of Privacy in IoT

Virtual

08.25.2022

1:00 p.m. ET | 10:00 a.m. PT

Connected devices continue to become more commonplace in our personal and professional lives. But what are the privacy challenges of data usage in IoT and mobile applications? This webcast discussion will explore privacy obstacles related to data usage, introduce the new Peekaboo Framework for Privacy in IoT and address some of the legal challenges companies might face in their decision to implement this and other frameworks.

GIAC and (ISC)<sup>2</sup> members can earn CPE credits for attending this webcast live.

This webcast is available for sponsorship. Email [information@rsaconference.com](mailto:information@rsaconference.com) for more details.
