

Artificial Intelligence Masters™ 2023

Copyrights and Artificial Intelligence: The Battle Between Content Creators and AI Developers

03.07.2023 | 11:30 AM

Join us March 7-8, 2023, for **Artificial Intelligence Masters™ 2023 – a part of the IPWatchdog Masters™ series**. This high-level, interactive, limited enrollment program will be held in person at IPWatchdog Headquarters, in Ashburn, Virginia, just minutes from Dulles International Airport. Discussions will be led by top thought leaders in the industry and will cover specific technical areas such as artificial intelligence (AI), machine learning (ML), blockchain and fintech, how to protect these innovations, how to license these innovations and the numerous other legal issues presented by their use and implementation, including the protection of data and software itself as a trade secret.

Agenda

11:30 AM - Copyrights and Artificial Intelligence: The Battle Between Content Creators and AI Developers

This panel will discuss the recently filed copyright infringement actions, the alleged copyright infringement, whether the actions by AI developers constitute fair use, and the future of content creation in an increasingly artificial intelligence driven world.

Speakers:

- Jim Gatto, Partner, Sheppard Mullin
- Devlin Hartline, Legal Fellow, Hudson Institute
- Kevin Madigan, VP, Legal Policy and Copyright Counsel, Copyright Alliance
