

Defend Your Data – How to Navigate Information and Cybersecurity Requirements to Secure a Place in the U.S. Supply Chain

Storgatan 5, Stockholm

09.07.2023

Event Sponsor: Swedish Security and Defense Industry Association

The United States has the world's largest defense budget. The United States also has the world's most far-reaching requirements for information protection and cybersecurity. SOFF is organizing a seminar on CMMC, the US Government data protection and cyber security requirements. The seminar will discuss industry trends, clarify the requirements, and provide guidance on meeting them. It is an ideal event for procurement, contracts, program and project management, and information security professionals. Gain a deeper understanding of Controlled Unclassified Information (CUI), CMMC, NIST 800-171, DFARS 7012, 7019, and 7020.

Companies that work with the US Department of Defense will soon need to meet CMMC requirements to bid on contracts. Cybersecurity Maturity Model Certification (CMMC) is a unified standard for implementing cybersecurity across the defense industrial base (DIB), which includes over 300,000 companies in the supply chain.
