

Compliance Institute 2023

Afternoon Plenary Session: AI Technologies and Predictive Data Analytics

New York, NY

10.24.2023 | 1:30-2:30 PM

Event Sponsor: New York City Bar Association

Corporate compliance responsibilities are becoming increasingly complex and compliance professionals have to deal with new and evolving laws and regulations, in an increasingly multi-jurisdictional environment. New and increasingly sophisticated technology, artificial intelligence, and machine learning solutions, together with the evolution of digital assets and cryptocurrencies, heightened demands by law enforcement agencies and regulators and potentially heightened personal liability add to such challenges. New SEC rules and DOJ guidance add to the complexity of managing a compliance program or advising compliance teams.

The Compliance Institute will uniquely provide learning opportunities for law firm attorneys, compliance professionals, consultants, and service providers. Special tracked offerings will have specialized sessions for those who work in asset management, broker-dealer, banking and general corporate compliance.

Speakers:

- Michael Gilbert, Partner, Sheppard Mullin
- Beth Haddock
