IAPP Privacy. Security. Risk. 2024

Foundations of Privacy and Data Protection

Los Angeles, CA

09.22.2024 | 9:00 AM - 5:30 PM

IAPP Foundations of Privacy and Data Protection is a comprehensive training course for quickly teaching privacy fundamentals to organizations and individuals. Foundations' expert-authored curriculum details privacy's legal and regulatory frameworks. It describes common operational processes, and illustrates data protection at work through case studies and real-world examples. Foundations training also teaches a common vocabulary that helps communicate data protection issues clearly between professionals and throughout organizations.

What you will take away:

- Knowledge you need to advance a career in privacy and related fields.
- In-demand skills you can start applying right away.
- A vocabulary of essential privacy terminology.
- Preparation for advanced privacy training and IAPP certification.

Speaker:

- Liisa Thomas, Lead, Privacy and Cybersecurity Practice and Chicago Office Managing Partner, Sheppard Mullin
