

Sheppard Mullin Represents IKS Health in Strategic Investment in Western Washington Medical Group

07.11.2025

A Sheppard Mullin Healthcare team represented IKS Health, a global leader in care enablement solutions, in its strategic investment in a newly formed management services organization (MSO) in partnership with Western Washington Medical Group (WWMG), an independent, multispecialty healthcare organization based in Washington State.

Through this transformative collaboration, IKS Health will oversee all non-clinical operations of WWMG, including revenue cycle, clinical documentation, HR, IT and finance, while WWMG retains control over clinical operations. The partnership is designed to enhance operational performance, scale value-based care, and drive sustainable growth through IKS's AI-enabled care platform.

The partnership marks a pivotal milestone in IKS Health's mission to deliver scalable, technology-powered care solutions that enable clinicians, elevate patient experience, and support the long-term independence of physician-led practices. [Read more here.](#)

The Sheppard Mullin team was led by Healthcare Industry Team co-leader Eric Klein and partner Chi Huynh and included partners Frank Dworak, Shawn Fabian and Scott Timpe and associates Melissa Shender, Kara Du, Alyssa Garcia and Chenxi Li.
