

Mechanical

We provide counsel and have expertise in a broad range of mechanical areas including machines, materials and process concepts, manufacturing processes, and civil, structural and industrial engineering concepts and techniques.

Our mechanical patent attorneys are experienced in conducting patent searches, preparing and prosecuting patent applications, enforcing patents, rendering right-to-use and validity opinions, counseling clients regarding infringement and licensing issues, counseling clients regarding trade secret protection and enforcement, and conducting due diligence studies. Beyond acquiring and protecting intellectual property in the United States, our attorneys regularly obtain and enforce our clients' intellectual property holdings in foreign countries. Further, we routinely advise clients with respect to their industrial designs and obtain design patents and industrial design registrations for the same.

The major clients that we advise include companies in the following industries:

- Medical devices
- Consumer devices
- Transportation
- Construction
- Agribusiness
- Sports & Recreation
- Cannabis
- Heat, Ventilating and Air Conditioning
- Infrastructure Protection and Repair
- Manufacturing Equipment
- Electrical and Fiber Optic Connectors
