

Real Estate & Construction Infrastructure

A multitude of the IIJA programs will touch on real estate and construction issues, including commercial construction, the hospitality industry, mixed-use facilities, multi-residential construction and senior living communities. Of course, numerous public construction projects like bridges and roads will be spawned by the IIJA.

We routinely assist clients in all of the foregoing sectors. We have a broad range of experience representing all parties in a real estate or construction project, including owners, general contractors, subcontractors, suppliers and engineers. We bring our experience to bear on every aspect of a construction project, from reviewing and negotiating real estate and construction agreements to assisting our clients in resolving disputes and claims in a timely and cost-effective manner.

Reach out to our [Infrastructure Task Force](#) for more information on how the IIJA may impact these industries.
