

Construction During COVID-19 Webinar

Webinar | A discussion on OSHA's guidance and enforcement, and what to do if they show up at the job site.
09.24.2020 | 10 - 11 a.m. CDT

The Occupational Safety and Health Administration (OSHA) is the regulatory authority on safe workplaces and construction sites. In this webinar, we will talk about what that means for the construction industry in times of COVID-19, as well as best practices and how to manage logistical challenges while running construction sites in accordance with OSHA and CDC guidance. We will also discuss how OSHA continues to implement its general and industry standards as both non-COVID-19 inspections and enforcement actions persist. Finally, we'll review what to do if an OSHA inspector shows up at your construction site or you find yourself in an OSHA enforcement matter.
