

Recent Developments in Life Sciences Law - What's New, What's Coming

Webinar

05.26.2021 | 10 a.m. - Noon CT

Join Stinson LLP attorneys for a seminar discussing current issues and recent developments that directly affect companies providing health care-related products and services.

TOPICS INCLUDE:

- **FDA Recent Developments:** Learn about what the agency has done, and what to expect, regarding digital health, pandemic-related regulatory flexibilities and more.
- **DOJ Enforcement Priorities & Proactive Responses:** Learn how to avoid the regulatory minefields for investors, such as private equity firms, in the health care and life sciences industry and the importance of proper due diligence.
- **Health Care Antitrust Spotlight & Vertical Merger Enforcement:** Not all transactions fit neatly into one bucket. Learn how deal structure can affect antitrust enforcement in the current regulatory environment.
- **Intersection between HIPAA & Privacy Laws:** Learn to identify which privacy laws are applicable to your data and how avoidance of HIPAA may unwittingly subject you to compliance obligations under new state, and potentially federal privacy laws through common real-world scenarios.

This seminar is for in-house counsel and others involved in providing strategic, legal and compliance advice for pharmaceutical and device companies. Some providers may find it useful as well.

CLE credit is pending in AZ, CO, KS, MN, MO, TX and VA.
