

Vorys Launches Utica and Marcellus Shale Twitter Feed

Related Industries

Energy, Utilities, Oil and Gas

NEWS | 3.12.2012

Vorys, Sater, Seymour and Pease today announced the launch of twitter.com/vorysshale, a Twitter feed dedicated to recent news and information related to oil and gas exploration in both the Utica and Marcellus shales.

With offices in Columbus, Cleveland and Akron, Vorys is located in the heart of the Utica Shale. The Utica Shale is believed to have significant natural gas and natural gas liquids stored thousands of feet under the surface. These natural resources can be accessed via horizontal drilling. The [vorysshale](https://twitter.com/vorysshale) Twitter account will provide updates from Vorys oil and gas attorneys. Vorys attorneys understand the complexities associated with horizontal drilling and hydraulic fracturing because they have counseled clients in each stage of the exploration process.

To read more about Vorys' work in the area, visit vorys.com/uticashale. Also, visit the firm's [Energy & Environmental Law Blog](#) for up-to-date developments in the field.

About Vorys: Vorys was established in 1909 and has grown to be one of the largest Ohio-based law firms with nearly 375 attorneys in six offices in Columbus, Cincinnati, Cleveland and Akron, Ohio; Washington, D.C.; and Houston, Texas. Vorys currently ranks as one of the 200 largest law firms in the United States according to *American Lawyer* magazine.
