AUTHORED ARTICLE | November 2012

Houston Chronicle

Jackie Ford, a partner in the Vorys Houston and Columbus offices, wrote an op-ed for the *Houston Chronicle* about electronic communications and user privacy issues. In the op-ed, Ford reminds readers that email communications can be easily read by an employer or subpoenaed by the government. She also notes that Facebook provides a one-step method for downloading a user's entire Facebook history and that text messages can also be discoverable.

To read the op-ed, visit the *Houston Chronicle* [website](#).
