PUBLICATION | 4.21.2025

Attorneys from the Vorys economic development incentives group co-authored a comprehensive data center development e-book for NAIOP, the Commercial Real Estate Development Association. The e-book, titled "Best Practices in Data Center Development," is a practical guide for real estate developers entering the North American data center market. It examines best practices, key considerations, and offers actionable insights to help developers navigate this specialized field with confidence and foresight.

Other co-authors of the e-book include professionals from Vista Site Selection (an ancillary business of Vorys), Ware Malcomb, FCL Builders, Henderson Engineers and Kimley-Horn. The e-book is approximately 60 pages and [is available for purchase here](#),

About Vorys' Data Center Practice: Our multidisciplinary data center practice offers the full spectrum of legal services to clients. We have assisted companies with data center development projects both across the United States and internationally. Vorys attorneys collaborate to provide clients with services related to data center development projects, including incentives, energy, taxation, real estate, finance, construction, zoning, environmental and more.
