

C-PACE for Green Roofs & Renewables in Philadelphia and Pennsylvania

5.12.20

Commercial Property Assessed Clean Energy (C-PACE) loans are designed to help property owners lower their operating costs with clean energy solutions that increase efficiency and reduce carbon emissions. Philadelphia and Pennsylvania have officially joined this national movement to enact their own C-PACE programs. As C-PACE loans grow in popularity, developers, lenders and advisors must navigate this changing landscape.

Join White and Williams LLP and CounterpointeSRE for the final installment of a four-part webinar series. This segment will discuss how C-PACE financing can help break down barriers to the adoption of green building infrastructure elements in Philadelphia and throughout Pennsylvania. Counsel Craig O'Neill will cover construction contract considerations, including an overview of key contract provisions for sustainable projects.
