

Introducing the C-PACE Webinar Series

Presented by White and Williams LLP and CounterpointeSRE
3.12.20

Commercial Property Assessed Clean Energy (C-PACE) loans are designed to help property owners lower their operating costs with clean energy solutions that increase efficiency and reduce carbon emissions. Philadelphia and Pennsylvania have officially joined this national movement to enact their own C-PACE programs. As C-PACE loans grow in popularity, developers, lenders and advisors must navigate this changing landscape.

White and Williams and CounterpointeSRE are pleased to announce a series of webinars this spring designed to explain the benefits of and answer questions about C-PACE financing.

events

C-PACE 101: Tuesday, April 7, 2020 | [Click here to view the recorded webinar](#)
