

Risk Management

Zetlin & De Chiara LLP is particularly skilled at devising strategies to reduce our clients' exposure and strengthen their position from the beginning of a project and throughout the evolving phases of construction. During the risk evaluation process, we identify areas of potential vulnerability and outline comprehensive dispute avoidance plans and risk reduction procedures.

Through our relationships with virtually every major construction insurance carrier, Zetlin & De Chiara provides meaningful counsel regarding risk protection. We have successfully pursued and defended claims under general liability, first-party property coverage, OCIPs, CCIPs, Subguard, and professional liability policies.

Our service also includes advising on the management of changing circumstances, appropriate documentation and, where necessary, project restructuring. Zetlin & De Chiara stays at the forefront of construction industry trends in order to anticipate risk issues before they become your liability.
