

## THE CURE The 2017 Healthcare Construction Report

09.19.2017 | 8:30 AM - 12:30 PM

As new healthcare policies and innovations are implemented, demand for new healthcare facilities and upgrades is growing. Further, an aging U.S. population, new technologies, rising demand for single occupancy rooms and increased healthcare consumerism are more and more shaping decisions about new hospital locations, design and functionality. Speakers from the healthcare construction industry will discuss the effects of these trends, and the uncertainty that financial concerns and government policy changes bring.
