

Minnesota Data Center Lawsuit

We are representing a mechanical engineer with respect to a claim relating to the design of a data center in Minnesota. The owner of the data center is one of the largest corporations in the United States. The technical issues in the lawsuit are highly complex, involving fluid mechanics and metallurgy. These issues impact the integrity of the equipment that was installed, which is vital to the operation of a very large data center with claims in excess of \$20 million.

PRACTICE AREAS

Litigation & Alternative Dispute Resolution
