

Power Generation & Distribution

Zetlin & De Chiara has extensive experience crafting construction contracts and resolving disputes in projects involving Power Generation & Distribution. Examples of the types of projects in which we have been involved include Wind Power, Bio Mass Fuel, Waste to Energy, Nuclear and Water.

The following are select representative matters:

Florida Bio Mass Fuel Plant Litigation

We represented a client in a litigation in connection with breach of contract and alleged negligence claims associated with the highly technical design and construction of a bio mass fuel power plant in Florida.

Multinational Energy Firm Dispute With An European Equipment Supplier

Zetlin & De Chiara represented a multinational energy firm operating a sophisticated network of photovoltaic solar plants in a dispute with an European equipment supplier, analyzing the merits of the client's claims and initiating arbitration proceedings arising from deficiencies and breaches of warranty of critical equipment totaling tens of millions of dollars.

Solar Power Construction Alternative Dispute Resolution (ADR)

We are representing a multi-national photovoltaic solar energy firm in a dispute with an Italian equipment supplier. The matter, which will be adjudicated in arbitration, will focus on deficiencies of critical equipment on the solar plants and related warranty claims.

Waste-to-Energy Facility Design Litigation

We represented a client in a matter involving a multi-million dollar claim in connection with the design of a waste-to-energy facility.

Wind Farm Dispute

We litigated a large multi-million dollar wind farm action in the Northeast involving various claims of trespassing, nuisance and negligent design, and violations of environmental impact statements.
