

Michael Vardaro Presents on Building Information Modeling (BIM)

New York

Michael J. Vardaro of Zetlin & De Chiara is pleased to announce that Michael Vardaro will be presenting on the expanding use of BIM for project lifecycle purposes.

"Contracting for BIM Lifecycle Uses," is a 90-minute webinar, taking place on June 4, which will cover topics, including scheduling (4D), cost estimating (5D), sustainability review and facility management. It will also address issues that may arise in modifying standard industry BIM contracts to establish meaningful deliverables for these new lifecycle BIM uses. Those invited to participate include attorneys, public and private owners, architects, engineers, construction managers, contractors, subcontractors, suppliers, manufacturers and BIM consultants interested in exploring BIM for lifecycle project use.

For more information and to register, please access the event website [here](#).

Zetlin & De Chiara is at the forefront of legal issues in BIM management. The firm has presented and written on this topic, as well as other cutting-edge design and construction topics, and continues to advise clients on the benefits and challenges of new technologies and construction delivery methods.

Michael J. Vardaro is the Managing Partner at Zetlin & De Chiara LLP. Michael focuses his practice on construction litigation, drafting and negotiating construction contracts and providing advice to a variety of construction industry clients. A former construction worker with a degree in civil engineering, Michael's background gives him the ability to understand the intricacies and nuances of the construction process and to provide focused and innovative counseling to a wide range of construction industry clients. He works extensively with regard to advancements in the construction process, including design build, integrated project delivery (IPD), building information modeling (BIM), and sustainable/green design and construction.
